Test Case ID	13	Passed/Failed
Test Case	Admin deletes the last account from a customer.	
Steps	Expected	Actual Result
1. Run programme	Prints welcome message and prompt user to enter username	
2. Enter: "Arthur"	After username, prompt user to enter password	
3. Enter: "123"	After password, it displays message logged in as admin and print the admin menu and prompt user to enter input	
4. Enter: "4"	As per requirement, here we must last account so, here input will be "4", this will take to GUI window named "Account Management Portal", it will ask the admin for the details of customer to delete the last account.	
5. Enter all the required details	For deleting account, it will ask for the username, password, and account number, to delete the last account, we try to delete the Boris account, he has last account in the bank, then to delete the account click "Delete Account"	

6. Click "Delete Account"	After click "Delete Account" it will give message that this user has the last account in the bank and last account cannot be deleted with username and account number, after that it says to click "OK",	
7. Click "OK"	After clicking ok it will clear the deleting form and again will ask enter details to add account or to delete account, so last account will not be deleted, and Test passed to close the GUI window you can click "Exit" button.	

Instructions:

- I. Programme start to run
- II. Enter "Arthur" in the text prompt "Enter your username:"
- III. Enter "123" in the text prompt "Enter your password:"
- IV. After logging successfully, it displays the message of logged in as admin with the username "Arthur" and displays customer menu and prompt Arthur to enter input
- V. As test case we must delete the last account of user, but only one user has the last account that is Boris, here we will select account management for deleting account by giving input "4", it will take to new GUI window name "Account Management Portal" and ask Arthur to enter details like username, password, and account number, after to delete account please click "Delete Account"
- VI. Then new pop-up window appears, and it will display message that user cannot delete last account from the bank and account will not be deleted, then it will say to click "OK",
- VII. After clicking "OK", it will clear the delete form and ask Arthur to enter again the details to add account or to delete account, the programme continues to run, and Account will not be deleted, and Test passed, then to exit the GUI window click "EXIT" and programme will end

Test Case ID	14	Passed/Failed
Test Case	Verify the newly added account is saved and loaded correctly by restarting the application.	
To verify the details, we will log in with new customer details and check summary.		
Steps	Expected	Actual Result
1. Restart app and Run programme	Prints welcome message and prompt user to enter username	<pre>(base) vishaljiodedra@Vishaljis-Air ~ % /Users/vishaljiodedra/opt/anaconda3/bin/python "/Users/vishaljiodedra/OneDrive - Birmingham City University/CM P4266/base code - banking_system/run.py" ----- Welcome to V - Banking System ----- Enter your username: </pre>
2. Enter: "Adam"	After username, prompt user to enter password	<pre>(base) vishaljiodedra@Vishaljis-Air ~ % /Users/vishaljiodedra/opt/anaconda3/bin/python "/Users/vishaljiodedra/OneDrive - Birmingham City University/CM P4266/base code - banking_system/run.py" ----- Welcome to V - Banking System ----- Enter your username: Adam Enter your password: </pre>
